WHERE TECHNOLOGY MEETS ART

TECHNOLOGY

MATERIAL TEXTURE THE AWAKENING OF TECHNOLOGY

We explore the boundaries of science and technology, capture the artistic inspiration of designers into the beauty of the world, pay tribute to the original heart, the beauty of the artisan build time and life. Mind the dream,

innovation and breakthrough to build a better living environment and unremitting efforts. Independent research and development innovation system, to turn inspiration into reality.

The unique material of porcelain congeals the wisdom of human and the power of science and technology, takes the beauty of nature and integrates the beauty of science and technology to create classic works.

ART

LIGHT AND SHADOW THE AWAKENING OF ART

Dare to subvert tradition and keep pace with the times. Transform the traditional tile brand into a variety of artistic images, so that each tile becomes a work of art worth displaying.

Through various innovations, the magic of humanities and light and shadow design is condensed between square inches,

turning it into the charm of art and decorating life. Appreciate life from art, and appreciate art from life, make art live, and make life artistic.

LIFE

NATURAL THE AWAKENING OF LIFE

The masterpiece of nature is full of vitality. Turn decay into magic, turn cold ice into warmth.

The design of Dongpeng tiles revolves around the original natural landscape to maintain a dialogue with nature. Provides a new interpretation of the residence,

that is no longer a simple and independent residence, but more like a space integrated with nature, in a non-disguised way, symbiosis with nature.

Dongpeng

About us

Founded in 1972, Dongpeng is a leading Chinese manufacturer of high-end ceramic tiles, sanitary ware, wood floors, coatings and other household architectural materials. It has always committed to specializing in the research and development, production and sales of high-quality architectural ceramic and sanitary products and providing consumers worldwide with trustworthy, green, environmentally friendly, healthy and comfortable one-stop services.

Dongpeng features large production capacity, numerous sales outlets and strong innovation in R&D. **It has six factories of ceramic tiles and four of bathroom sanitary wares and over 6,000** distribution outlets worldwide.**Its products have been exported to over 106 countries and regions**, such as America, Canada, England, Italy, Saudi Arabia, Russia and Southeast Asian countries, etc.

Dongpeng has been recognized as an iconic brand in the industry due to its well-known branding, product quality and competitive services. In this way, it has become the priority of strategic partner for many business partners and successfully been part of numerous landmark projects like the National Grand Theater, the China Millennium Monument, nine Olympic Venues, the World Expo and the Asian Games Venues, etc.

Dongpeng established the first ever 2025 Big Data Platform in Architectural Ceramic Industry to realize the intelligent, informational and standardized manufacturing of the integrated home furnishing materials. **It participated in the drafting of as many as 47 standards for ceramic tiles and sanitary wares, successively obtained 1,051 national patents and registered more than 30 national trademarks.**

Dongpeng will always be committed to in-depth brand evolution and upgrades by keeping up with the trend of consumption and fashion worldwide in order to provide consumers with more diverse and novel experiences in a brand new perspective. Taking Technology, Art, and Life as the core driving forces, Dongpeng will continue to explore more possibilities of home living. Where Technology Meets Art To Create a Better Living Space.

Research

And develop strength

7 PRODUCTION BASE

Most industries are concentrated in their own research areas, and even many are closed-door, theoretical strong, the lack of market-oriented industrialization of product awareness. Dong Peng Ceramic Tile organization different field related authority personage carries on the technical feasibility, the product manufacturability, the technology development tendency,

the market space and the investment return and so on the appraisal currently in the research project, help to find the market-oriented research direction of products, create product value, promote the transfer of products around the market. In order to promote the efficient allocation of scientific and technological resources, open sharing and integration as the focus, accelerate the realization of scientific research results commercialization, industrialization and internationalization.

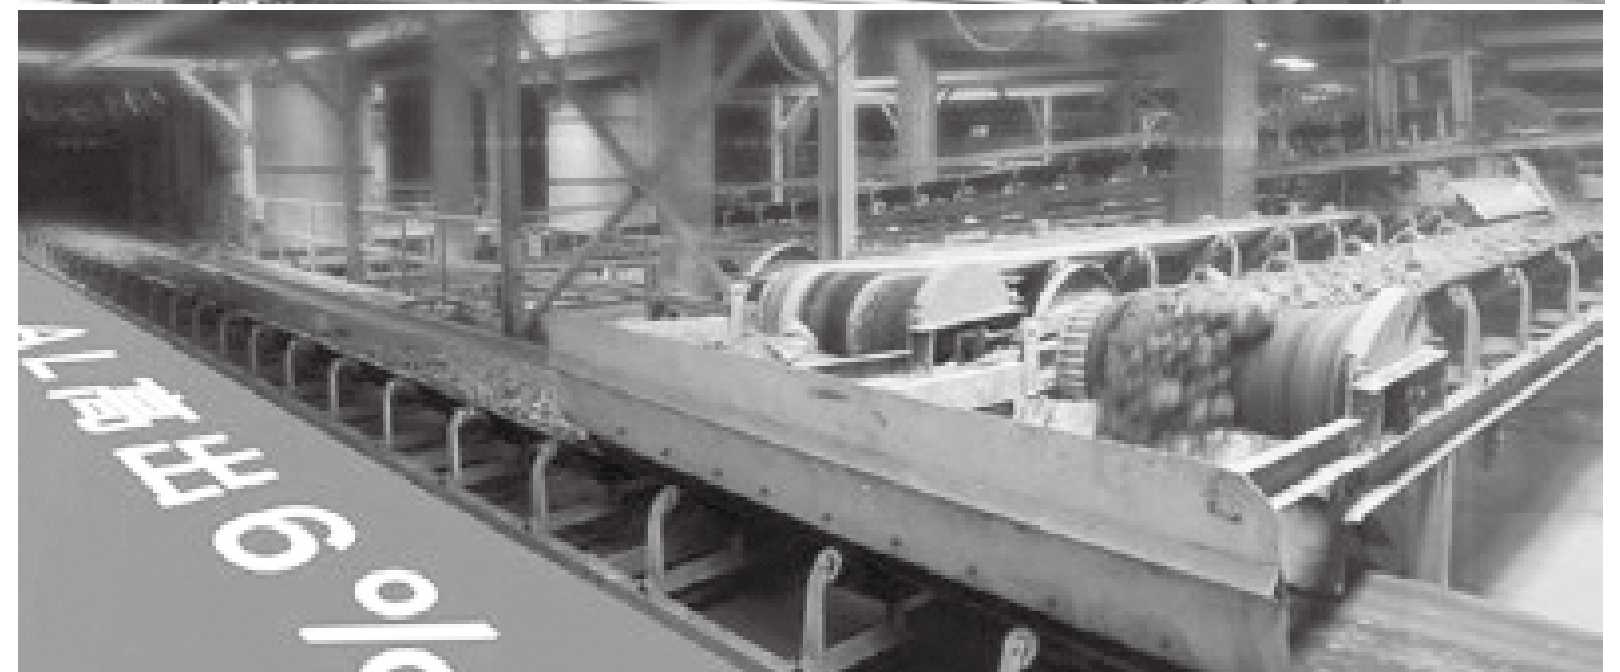

Dongpeng holding has 7 major ceramic tile production base, Foshan, Qingyuan, Hunan, Shandong, Jiangxi, Chongqing, Shanxi.

Since its establishment, Dongpeng has attached great importance to the adjustment and transformation of its production process equipment, and has successively imported machinery and equipment from Germany and Italy that are in step with the international market, fully Guaranteed Dongpeng polished brick production technology leading: Ph7200 tons of Italian SACMI (SACMI) press, 1800X1200MM polishing machine, large-scale molding die, advanced drying kiln, as well as the world-class advanced equipment such as micropowder secondary feeding system, raw material feeding system, micro-powder processing system, granulation system, etc. , and the selection of foreign high-quality raw materials, color glaze, to ensure the best quality and stability of the product.

HEALTH SMART MANUFACTURING

Attaching importance to the power of the brand and letting the brand take the lead is the key to building the national brand and condensing the power of China. It is also the base for every enterprise to settle down and live. As a demonstration unit of the **"Made in China 2025" of China's architectural ceramics industry**, Dongpeng is actively responding to the country's development direction and realizing the transformation from manufacturing to intelligent manufacturing.

Registered International Trademarks in nearly 30 countries and regions, including the United States, the United Kingdom, Germany, Italy and other products sell well overseas, the largest exporters include the United States, Canada and Australia and other high-standard countries. Representing Chinese ceramics at the world's top ceramics fair, Tai Lei's exhibition earned worldwide respect for Chinese ceramics with its innovative products. For the majority of consumers to provide environmental protection, art, high-tech, personalized home solutions, is the pursuit and mission of Dongpeng. In the future, Dongpeng will continue to innovate beyond, in order to provide more users with quality and taste of enjoyment.

Dongpeng Factory Introduction

1
PRODUCTION LINE

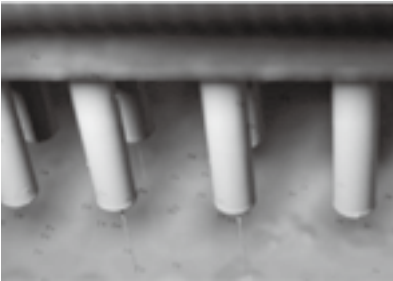

With the most advanced and modern automatic production lines, Dongpeng can provide the high quality products that exceed the market expectations.

2
RAW MATERIAL

Using high aluminum materials with aluminum content of 21%, Dongpeng's tiles have higher rigidity.

3
INSPECTION

All raw materials will be inspected, so that the quality is controlled from the beginning

4
BALL MILL

Dongpeng uses 60-ton ball mill, which is made by high quality aluminum, can provide stronger impact and better grinding.

5
DE-IRONING

Dongpeng uses high magnetic electric magnet to absorb the iron elements, and purify the tile body.

6
FEEDING SYSTEM

Dongpeng has the unique 32-tube feeding system, being exclusive in the industry, which helps Dongpeng to develop unique tile texture.

7
DRYING KILN

Dongpeng uses automatic 5 layer drying kiln, which reaches 250 meters. This will dehydrate tiles, ensuring moisture content below 0.6%.

8
STORAGE SYSTEM

Dongpeng has the unique laser-controlled automatic storage system, which improves the protection of each piece of tile.

9
FIRING TIME

Dongpeng extends the firing time to ensure the tiles' high hardness and resistance.

10
POLISHING

Dongpeng ceramic has longer polishing time, and higher brightness, which ensure longer product lifespan.

11
TESTING

Every piece of tiles produced by Dongpeng will pass machine inspection and manual inspection.

ECO FRIENDLY

Dongpeng has always insisted on green, low-carbon, and high-quality production. With a total investment in environmental protection of more than RMB 60 million, DFB is one of the factories with the most investment in green production and manufacturing in the industry.

The imported roller kiln equipment realizes automatic temperature control and adjustment during the firing stage, so all the kiln flue gas can be recycled with fuel consumption only 1.65 m³/ m² , equivalent to saving 20% of natural gas over an ordinary kiln for 1 m2 tile. Maximizes energy conservation and recycling.

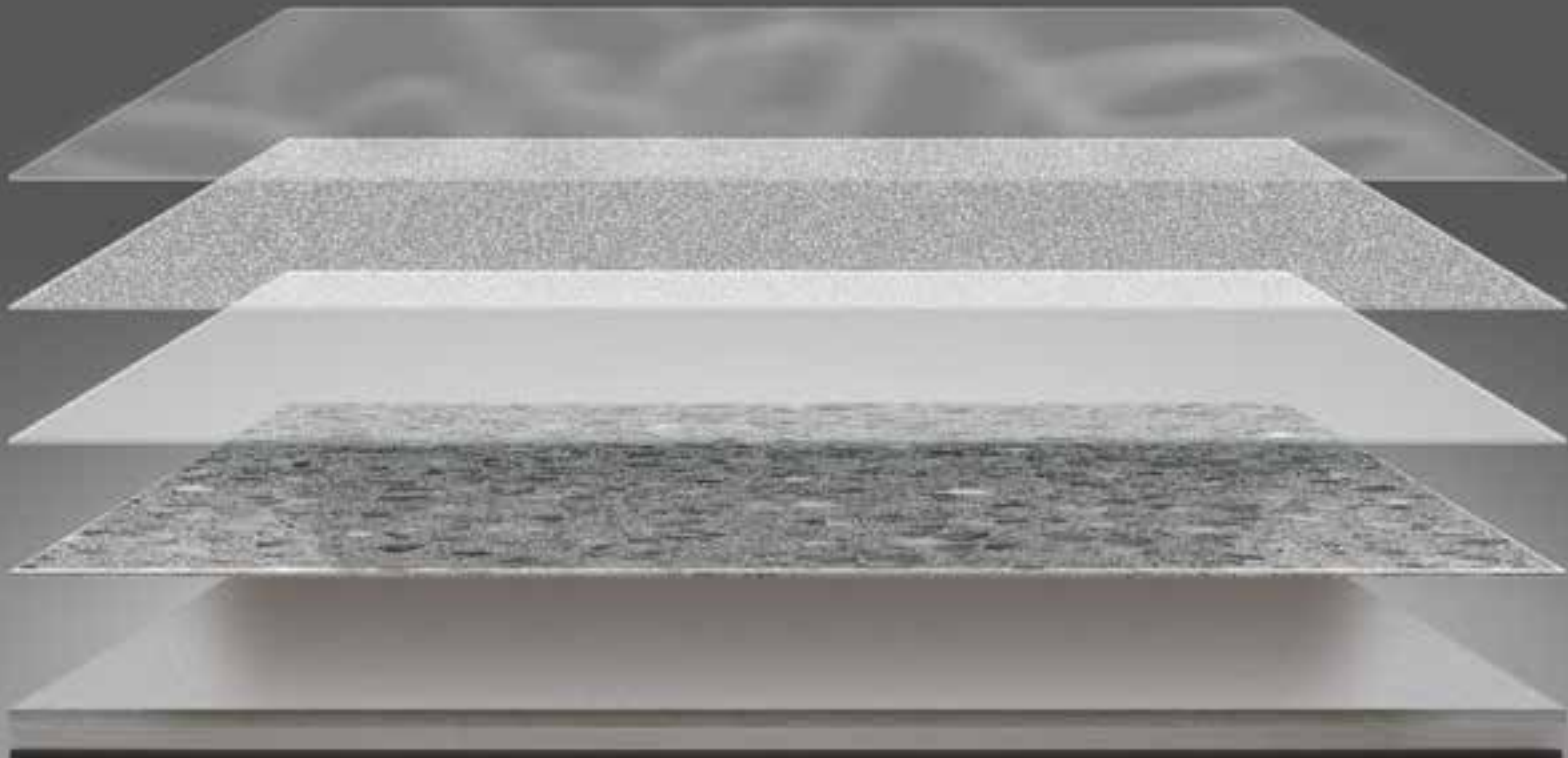

DFB actively responds to the dual-carbon policy. It has realized energy conservation and emission reduction in the whole production process. It has invested over RMB 40 million to build 4 desulfurization and denitrification towers to control the flue gas emissions of kilns and spray towers far below the national emission criteria.

It has also invested over RMB 10 million to build dust removal equipment to recycle dust as raw material. It has introduced advanced PV power generation equipment with 20MW installed capacity, which generates 20 million kw power a year, saving up to 3,700t of standard coal. It has provided multiple sedimentation tanks in the factory, with wastewater recycled after treatment and all waste sludge reused. Improved the on-site environment and realized 100% recycling.

DFB's green, super-factory, focusing on high-quality intelligent production, adhering to the green development concept of "Low-carbon Dongpeng, Green Construction Pioneer", with a strong sense of corporate social responsibility, is working hard to create better, living buildings.

In the vast sky, there will be several changes from the rising sun to the setting sun. Either way, they are all unique. Hanhai Nebula selects the time period of night as the design blueprint, and uses light gray on a white background to form a highly layered line texture, which perfectly presents the dreamy picture of the vast night sky when the nebulae meet each other on the whole brick.

The hellenic mythologies are lost in the mist of the past, yet its marvelous stones are still shining all its splendor in the modern building materials industry. Our "art beats nature" marble is born exactly in this most inspiring capital. Extracting from the mines in North Greece, Caliza keeps its purity, coming out of mud unsoiled. With this extra quality, it is as gentle as jade, as elegant as pearl. Being like cracks of light filtered through the shutters, the exquisite texture and delightful grains make it a noble choice for premium space like villa and hotel, with an extensive size range catering to the various needs to all countries and customers.

The time marble is inspired by European palaces, castles, and churches, extracting marble elements from it, showing the passage of time, the wind, frost, rain and snow, as well as the scratches and holes left by time on the walls and ground of the palace. The texture of this series adopts the old marble texture of European palaces. By lightly pickling the original stone, treating with small scratches, and restoring the time-eroded texture with slight fluctuations, combined with the pit mold + dry-grain soft polishing process, the stone is created with texture, experience and human firework.

Chile is currently the country with the most abundant copper mines, with its reserves accounting for 29% of the world's total; its output and exports also rank first in the world.Pure copper is a soft metal, the surface is red-orange with metallic luster when it is just cut, and the element is purple-red. Copper is one of the earliest metals used by humans.As early as prehistoric times, people began to mine open-pit copper mines and use the obtained copper to make weapons, utensils and other utensils. The use of copper had a profound impact on the progress of early human civilization. World Impression-Briliant Copper, inspired by the brass material that modern minimalist luxury homes love. After pickling with a cold plate, the flame-like colors are further layered, creating a dazzling vision of the space.

Steel is a general term for iron-carbon alloys with a carbon content between 0.02% and 2.11% by mass. Brazil is a major steel country in South America and the sixth largest steel producer in the world. Its steel exports reached 12 million tons, accounting for 54% of the country's total steel production. Dongpeng World Impression Lie Steel uses stainless steel material with a cold texture as the base, and covers the surface with lightweight concrete. The creative superposition of two different materials makes the texture and vision more layered.

The Country of Silver---In 1527, the Spanish explorer Sebastian Cavoto led an expedition to the South American continent, and went upstream from a wide estuary to the interior. The explorers found that the local Indians were wearing a lot of silver ornaments, thinking that the local area was rich in silver, so they named the river La Plape River and the area called La Plata District. The Spanish colonial rulers later converted La Plata into a province. Dongpeng World Impression Silver Lacquer, takes the color and texture of silver, and sticks the silver foil on the paint base plate in a regular manner, and then irons it flat. The dazzling dazzling sense shows the temperament, and it also highlights the modern geometric sense, personality.

Iron is the earliest discovered, the most widely used, and the most used metal in the world. Brazil's iron ore resources are mainly distributed in Minas Gerais, of which Vale is the world's largest iron ore producer and exporter, as well as the largest mining company in the Americas. Stone production accounts for more than 85% of Brazil's total production. Dongpeng World Impression-Zheng Iron, which imparts the texture of iron to the tiles, and the semi-polishing technology of metal dry grains gives them gloss, which is born from the birth of Zheng Iron.

A piece of pure gold the size of a mung bean can even be rolled into gold foil with an area of 0.6m². In addition, it has the strange property of reflecting infrared rays and only allowing visible light to pass through. It can be used to make masks for firefighters. Sticking this gold film on the glass can effectively adjust the indoor temperature. Such golden buildings make people feel as if they have entered a "golden world" that is splendid and like spring in all seasons. Dongpeng World Impression-Gold Lacquer, the color of gold, the texture of lacquer, the texture of golden paint brush and the refraction of dry metal particles in light and shadow create a mottled texture of gold foil to show a different luxury.

PLACEMENT GUIDE

1. Before box opening, please verify product specification/ dimension, color, etc; make sure product of the same model is put in the same area instead of blending product of different types (unless a special decorative effect is pursued on purpose).
2. Before placement, dress the wall or floor well; determine brick arrangement according to placement type; in case of directional pattern, the product shall be applied as per the marked direction to reach the optimal decorative effect.
3. During pre-placement, pull two mutually vertical lines in the dressed ground and check leveling with the spirit meter; the wall vertically is checked by the plummet.
4. The ceramic sheet is recommended to be used together with 225#cement; the ceramic tile is recommended to be used together with 325#cement or glue; before placement, the ceramic sheet shall be fully soaked instead of ceramic tile.
5. Mark line according to tile dimension and pay attention to reserve mortar joint.
6. During placement, tightly seal the joint by glue; upon request by customers, proper color additive can be used to fill in the joint.
7. During placement in main wall corner, proper amount of glue is applied to reach 1cm thickness; put one tile in the glue; slightly knock it with a wooden hammer to ensure the tile surface, edge and the pulled line in parallel or vertical position.
8. During placement of wall tile, slightly knock on the tile a good many times till it is tightly fastened.
9. After placement in 1 hour, clean cement or other dirt in the tile surface timely till thorough cleanliness of tile surface.
10. After placement in 12 hours, make inspection by knocking on the tile surface. In case of hollow sound, rework is required.
11. Don't walk on or sweep the tile till 24 hours after placement. Thoroughly clean the tile by fresh water mixed with detergent. The shining floor and wall will be presented in front of you.

PROPERTIES	UNIT	ISO STANDARD REQUIREMENT			RESULT
Size & Deviation	%	SIDE	The deviation of the average size of each tile from the work size	±0.5	-0.02- +0.03
			The deviation of the average size for each tile from the work size of the 10 test specimens	±0.4	-0.01 - +0.01
		Thickness		±5	-0.1 - +1.0
Straighteness of sides	%	±0.2			-0.03 - +0.06
Rectangularity	%	±0.5			-0.06 - +0.03
Surface flatness	mm	Center curvature		±0.4	-0.02 - +0.04
		Warpage		±0.4	-0.02 - +0.05
		Side curvature		±0.4	-0.08 - +0.05
Surface quality	-	A minimum of 95% of the tiles shall be free from chip, crack speek and visible defects that would impair the appearence of major area of			Complied
Water absorption	%	Average: E ≤0.5			0.3%
		Single piece:E≤0.6			0.3%
Breaking Strength	N	When the thickness ≥7,5mm, the mean value shall not be less than 1300			2183
Anti-slip	R	9			4
Resistance to household chemical reagent & swimming	-	No less than Class UB after test			Class GA
Resistance to low concentration acid or alkali	-	Report the result after test			Class GA
Stain resistance	-	No less than Class 3 after test			Class GLA
Certificate of static friction	-	Report the result after test	Wet	0.49	
			Dry	0.57	
Lead release Cadmium release	mg/dm	Report the result after test			No release
	mg/L				No release

UNGLAZED PORCELAIN

PROPERTIES	UNIT	ISO STANDARD REQUIREMENT			RESULT
Size & Deviation	%	SIDE	The deviation of the average size of each tile from the work size	±0.5	-0.01- +0.02
			The deviation of the average size for each tile from the work size of the 10 test specimens	±0.4	-0.02 - +0.01
		Thickness		±5	-0.9 - +0.9
Straighteness of sides	%	±0.2			-0.04 - +0.05
Rectangularity	mm	Length difference of opposite sides ≤2.0			0.5
		Length difference of diagonal lines ≤2.0			0.3
Surface flatness	mm	Upward warpage		≤2.0	0.3
		Downward warpage		≤2.0	0.3
Surface quality	-	A minimum of 95% of the tiles shall be free from chip, crack speek and visible defects that would impair the appearence of major area of tiles			Complied
Water absorption	%	Average: E ≤0.5			0.06%
		Single piece:E≤0.6			0.4%-0.08%
Breaking strength	N	If thickness ≥7.5mm,N≥1300			2491
Modulus of Rupture	MPA	Average: ≥35 Single piece: ≥32			59.8 40.7-84.1
Abrasion resistance	mm	Abrassion CBM ≤175			116
Glossiness	-	≥55			88-90
Resistance to household chemical reagent & swimming pool alkali	-	No less than Class UB after test			Class UA
Thermal shock resistance	-	Report the result after test			No crack
Resistance to low concentration acid or alkali	-	Report the result after test			Class ULA
Stain resistance	-	No less than Class 3 after test			Class 5
Coefficient of linear expansion		Report the result after test			7.1x10 ⁻⁶
Moisture expansion (mm/m)		Report the result after test			<0.01
Shock recovery coefficient	-	Report the result after test			0.83
Certificate of static friction	-	Report the result after test	Wet	0.53	
			Dry	0.59

Each different tiles series are produced to meet different performance requirements. For specific product technical performance, please request Dongpeng sales team or their agent or distributor.

Colour variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristics of porcelain tile.

Due to the low porosity of porcelain tiles, an Improved High Performance Cementitious adhesive in accordance to BS EN 12004 & ISO 13007-1 is highly recommended for proper installation. Products that meet this standard are available amongst leading adhesive manufacturers. Please seek expert advice from adhesive manufacturers for proper selection and application.
